

SECRET

FACT SHEET
ON
TRUCKS DESTROYED OR DAMAGED BY TYPE AIRCRAFT
1967-1970

- Statistics on the number of trucks destroyed or damaged per truck struck were collected starting in November 1969. Prior to that date only data on trucks destroyed or damaged per attack per sortie are available.
- The attached tables present the available data by type of aircraft month for the dry season campaigns 1967-1970. The underlined numbers are based on very small samples and are considered not typical.
- The most comparable and most meaningful data are the number of trucks destroyed or damaged per sortie. The basic reason is an aircraft sortie. The number of kills achieved on a sortie combines considerations of accuracy, armament load, loiter time and ability to acquire a truck target.
