Bob,

I am not a litigious soul. Just a son that should be able to know what happened to his father. You told me that you trained with Bernie and my gut told me that you had a story to tell and felt some compassion towards my predicament. Maybe your counsel can craft a document that will provide you the protection you feel is necessary to talk with me. It's been 38 years. What would you feel like if you were in my situation? I've built a life for myself with a wonderful family and am not seeking revenge just closure.

I haven't even been able to find out how Bernie lived in Viet Nam much less how he died. Anything would be helpful. Please think about it. I'll do whatever necessary to put you at ease so we can talk.

Bob

Bob --

I have not been ignoring you, but on the advice of counsel it is deemed best that I do not discuss this subject.

Should you desire to know more about your father's accident, it is suggested that you contact the Air Force's Office of Flight Safety. Under the Freedom of Information Act, you'll probably be able to get more information than I can remember after some 35 years.

Robert,

Please contact me as I've tried to get in touch with you several times since the reunion. I'll come to you if need be but I'd like to talk.

Thanks

Bob Knapic
